Catch the Current!

A Program of  HRDC

APRIL UPDATES

Even though we are experiencing a very challenging and unique time in history, the need for expanded public transit and additional transit funding still exists and may even be more critical once the current pandemic subsides. Thus, we really want to keep the momentum going with the Redesign Streamline 2020 project. Thanks for being involved in this group and committed to this project!

THANKS BELGRADE!!

In March, the City of Belgrade committed \$20,000 to the Redesign Streamline 2020 project. They now join the City of Bozeman, Gallatin County, Bozeman Health, and the Montana Department of Transportation as funding partners in this study.

Redesign Streamline 2020 Survey

Please take the Redesign Streamline 2020 survey as soon as possible. This survey only takes 5-10 minutes to complete and is critical in helping us better understand travel patterns in Bozeman.

Existing Conditions Report

Our transit consultant has released a final copy of their existing conditions analysis of the Streamline system. Please review the report and reach out with comments! This plan will guide the next phase of the Redesign Streamline 2020 project.

ONLINE MEET UP??

Would anyone be interested in attending an online web meeting this month where we discuss the existing conditions report, online survey, COVID-19 and transit, etc.? If so, email vpalmer@thehrdc.org with the days/times that work best for you.
